

How to access to access quarantined message

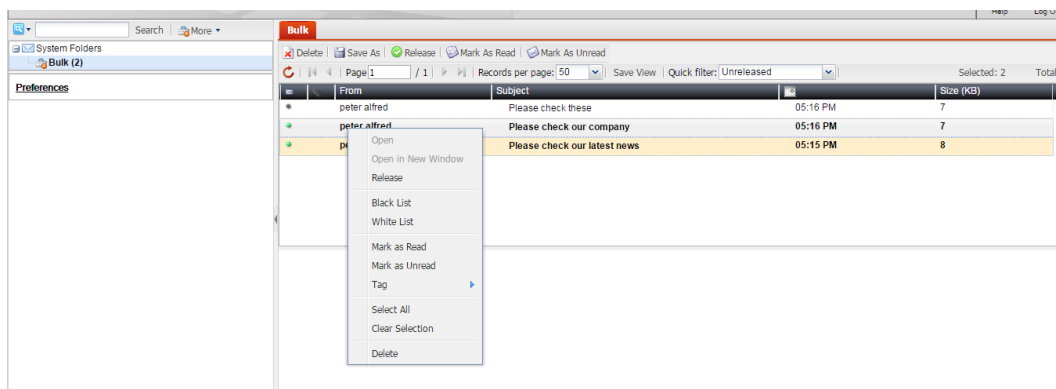

Go to <https://mailfilter.linkdatacenter.net/mail/WebmailLogin.html>

Login using your email address and password

You will get the following window show all messages that was flagged as spam

Click to select the message you wish (and multiple messages using **shift** key or **ctrl** key)

Right-Click and you'll get the options

Release: Message is released and will arrive to your inbox

Delete: Message will be deleted

White List: Message will be marked as Safe and similar messages will arrive to your inbox

Black List: Message will be marked Unsafe and similar message will always be caught as spam

You can also release messages using the release button as below
